

As having exceptional skills in different technologies, I am writing to express my interest in the software development position at your company. My career goals align with your ultimate goal that is the pursuit of new technology or innovation. I believe that my skills and my dedication to learn new technology make me the right candidate for the role of Software Developer at DE Shaw & CO.

During my apprenticeship at Talent Sprint, I created an event management website using technologies such as HTML5, CSS, Bootstrap, SQL, and Django Framework. In this website, a user can register into the website through which he can be able to purchase tickets of the ongoing events at particular venues. Users also get access to personalized content according to their favorites.

I also participated in many hackathons and have won prizes for brainstorming ideas. During my graduation I held multiple seminars on evolving technologies such as AI and Machine learning which are the future of technology. My goal is to excel in the technologies which I already know as well as to learn new technology

I really admire how DE Shaw & CO thrives for excellence for all its product lines, creating market-leading tech. As someone that thrives in a self-driven environment, I truly believe that I and DE Shaw & CO will be a great match.
